

Breast Blocked Duct

Testimonial # 130

I wanted to have a healthy life and as a nurse with a lot of sick people around me, I was searching for a product to enhance my "Boomer" years. My friends told me about HMS90/ Immunocal at a time when I had a sinus problem, then I got the **flu**. Working all different hours I needed something to work for me Right away. I took one pouch a day and when I got sicker they told me to take two pouches a day. I did that; I got well in 3 days! It works! In April I went for a regular breast screening at the clinic, and was referred to my own doctor for follow up tests because they had found a dark area in my left breast and a lump under the same arm. He scheduled me to see a woman breast specialist and a surgeon. A biopsy revealed that there was 4 inches of my left **breast duct that was blocked** with an overgrowth of tissue and it was full of fluids. There was a slightly bloody discharge upon aspiration. The lump under my left arm indicated that the duct was blocked up to the armpit and must be removed. I WAS FACING LOSING A BREAST!! HOW DEVASTATING!! I asked for a second opinion before surgery. My doctor sent me to the man that was to do the surgery. We talked and I asked for another set of tests, he agreed. I did not tell him WHY! I knew I needed some time because I had been listening to Dr. Somersall for over 10 years, also heard many firsthand stories at the Toronto meetings with my upline and believed the recoveries. I understood there was a decrease in my body's antioxidant enzymes which protect my body against free radical damage. I believed the bio active "glutathione" in HMS90/IMMUNOCAL were the properties my body needed to fight this attack of foreign bodies and it would be efficient enough for me. I increased the 4 pouches a day/ the Vitamins and I also rubbed the Skin Perfecting Cream on my left breast every night. I took no other medications during this time; I believed this was a must for my recovery. Six weeks later I had been through the second set of tests and was scheduled to visit the surgeon to discuss the operation. He began to tell me that he was amazed that the lump under my arm was already smaller in size, that the 4 inches of infected duct was also decreased in length and there was no trace of blood in the aspiration; he was happy to tell me that as far as he is concerned there will be "NO SURGERY" He said, YOU ARE IN A RECOVERY STATE—WHATEVER YOU ARE DOING –DO NOT STOP!! I was extremely excited and I jumped off the table and kicked up my heels. Yes!! He asked me "what is it you are doing anyway?" I spent the next 20 minutes in my surgeon's office discussing HMS90/IMMUNOCAL and the products with him. That beats surgery anytime; I would like to tell you!! When I was done, he said to me" I can see you have faith in this and you will recover if you do not stop what you are doing, come back and see me in September. Here is my email address to tell me more about this Supplement. Please tell my son too, he is out at the front desk." He was fascinated about the value of this dynamic product. THANKS to all those who have contributed to the availability for me to get wellness in my body. Especially to Immunotec Research Ltd. For the amazing discoveries that I was able to benefit from! Blessings to all of you. Sincerely, **Judith A. Jewell-Belfry, RN** 07/14/2001

Cyst in Breast Testimonial #180

Dear Dr. Petrosino "My **cholesterol level** went from 340 to 140 after only 15 days of taking 2 packets of Immunocal per day. Also, I had a fairly large **cyst in my breast** which my doctor first saw 4 or 5 years ago. Each year I had an ultra sound and it was slowly getting bigger. The doctor was going to biopsy it this year, but after my ultrasound, it had almost completely disappeared! Immunocal is the only thing I have been doing differently."

Sincerely, Elizabeth Ackerman Wednesday, October 24, 2001
