

Mr. Robert Forget's story on Immunocal – as told by Cathy Renzella

In May of 2001, my father was diagnosed with cancer of the esophagus. He was 67 years old and had never been sick a day in his life. His specialist said that they could not operate because there would be only a 5% chance of success and it would add only 2 years to his life. So he suggested strong chemotherapy treatments and radiation. As soon as I heard the news, I told my dad to take 4 pouches of Immunocal per day.

He didn't want to take it because he said it was too expensive, so we decided to give it to him as a gift. "There's no price for your life, Dad, and we want you around for a long time!", I told him.

So my dad started to take his Immunocal, 4/day in June and started his chemo and radiation in July. The treatments went on for the whole month of July and part of August. He had intravenous chemo and radiation every day (except on weekends). And every day, we could see the people scheduled before and after him getting weaker and weaker as the days and weeks went by. Ladies were wearing their wigs – and they looked so frail.

As for my dad... he NEVER had any side effects! During the chemo and radiation treatments, he was washing his car, cutting the lawn, bicycle riding and even playing softball! He didn't even lose his hair ... and that was extremely important to him!

Once the treatments were over, my dad saw the specialist again and he said that to his surprise, they could now operate, but this time, he had a 95% chance of success! The doctors were puzzled to see that the cancer had never spread and it seemed to have gotten much smaller. On September 17th, they operated. The surgery should have taken 5 to 6 hours but it only took 3 ½! And what a success it was!

When the tumor was analyzed, it was DEAD! No more trace of cancer, it was all GONE! Thank God! What a relief and blessing! My father had a second chance at life! What an awesome gift! I always say that faith in God & Immunocal is the best recipe for a healthy life!

My dad had a long incision on his neck (about 4 to 6 inches) and another on his stomach (about 6 to 8 inches). The one on his neck healed in record time... at Christmas, we couldn't even see it anymore. He would put the Immunocal Skin Perfecting Cream on his scar as soon as it was closed.

When the staples were removed from the incision on his stomach, the wound was almost totally open, only an inch in the middle was still closed. My dad panicked, because we could see right inside of his body! Doctors said that it should close around Easter... but it would be a very large scar. But,

by Christmas, it was totally closed! The doctors call my dad, their miraculous patient! As soon as Dad returned home from the... he went straight to the kitchen with his coat still on to prepare his Immunocal! Other patients suffering with cancer also started on Immunocal after seeing my father's success.

I thank Dr. Bounous for his perseverance in his twenty some years of research. Thanks to him, I have a better quality of life (no more allergies, chronic sinus problems, migraines & fibromyalgia) and we have my dad back!

Dr. Bounous' mother prayed that he might make a difference in the world... Well, her prayer was answered. He made a difference in my world, in my family's and in yours too, I'm sure. **Cathy Renzella**
