Eyesight Testimonial # 27

Carl Schenholm June 5, 2005

My name is Carl Schenholm. I am an 82 year old retired veterinarian, who has had macular degeneration for about 7 years. For about the last 2 years, my condition has been static with scar tissue. I have visited specialists at Wilner Eye Institute at Johns Hopkins in Baltimore, Bascom Palmer in Miami, Duke University Eye Center and Dr. Meir Schneider at the Institute for Self Healing in San Francisco. All of them said there was nothing that could be done because of the scar tissue. After being on 2 to 3 packs a day of Immunocal for 119 days, the spinning lights in the back of my eyes suddenly turned from white to orange. After 4 more days, I was able to see my face in the mirror while shaving (180 degrees with the left eye) for the first time in years. I was also able to see my wife's face. The black spot in my central vision of the left eye lightened to gray. I feel there is a 10% improvement in my vision which still remains after 2 months. My right eye seems to be slightly better as of today. August 7, 2005 I am now taking 2 packs of Immunocal twice a day, and the black areas in both eyes are becoming more porous around the edges. My left eye continues to see through 180 degrees and my right eye is slightly less foggy in the center. I am continuing to use Dr. Meir Schneider's self-healing techniques, such as palming and sunning the eyes and reading exercises

Eyesight Testimonial # 28

I **stopped** the **Immunocal** just to see what differences there would be. The immediate difference was that my **eyesight went back to being slightly blurry** all the time. I'm back on the Immunocal. I wasn't interested in finding out what other differences there were. :->) **Linda Atkinson**, Admin. Ops. Specialist, Executive Secretariat
