

## **Fungus/Mold # 125**

Linda,

Could you find out if Immunocal is okay for people who have "systematic candida" which is an overgrowth of fungus/mold and yeast in the whole body system. I need to know if the "whey" in Immunocal is okay for people with candida fungi/mold. So, please ask about the candida and let them know I have 15 strains of toxic mold that is causing the neuropathy. So, please ask about the mold/fungus as well.

### **John's answer:**

Immunocal/HMS 90 helps the immune system in a non specific way against viruses, bacteria, fungus etc. This would hold for Candida. As per the article below oxidative stress contributes to the disorder. Taking Immunocal/HMS 90 would optimize the immune response to counter the challenge and lower oxidative stress.
