

Headache/Migraines

For years I have suffered from headaches, I thought they were just normal headaches and man they put me on my butt, I mean I would come home from work and I would be laid out for the rest of the day...not good, then my boyfriend mentioned to me that I might be suffering from sinus headaches (I lived in chinook country, Calgary, AB) and gave me a couple of Tylenol sinus and it took my headache away, so I have been popping Tylenol for the last 7 years, can you imagine what my liver looks like...not good. Well then I was introduced to Xtra sharp and Immunocal and I have **NOT** taken a Tylenol sinus for 3 months...well let me tell you am I ever thankful and what a relief, I mean if you have ever had a sinus headache you will know what kind of pain I am talking about. I can't say thank you enough!!! Thank you Immunotec! **Nicky Ehrler, Penhold, AB**

Headache/Migraines Testimonials # 120

I used to suffer from migraines, but I have been taking the HMS 90 and Xtra-sharp and I have not experienced them since. When I do get a headache all that is needed is a tsp of sharp and they are gone within 30 minutes.
