## Hepatitis B Virus Testimonial # 15

Dear Dr. Petrosino:

**Hepatitis B Virus** (HBV) had downed me so much that I was feeling extremely weak everyday. I had no hope; hope that I could find a product that would help me so much. Thanks to Immunotec for developing this product. After using Immunocal for nine months, I have realized tremendous results and am getting more better as time goes by. I have more energy and vitality, and the **viral DNA test** indicates that the virus is going down gradually. My doctor was really amazed about the results and told me to keep using the product since INTERFERON didn't work for me. **The viral count went down from 5500 to only 500 the last time he did the test**, and I hope that I will clear the virus from my system. The **liver function test** is extremely good. At this moment, I feel 80% better. I am so excited to be part of Immunotec family and the product immunocal. I recommend anybody with HBV to try this product. Best Regards, **James Busienei** March 27, 2002

## Hepatitis C Testimonial #16

"I was diagnosed with Hepatitis C and cirrosis in 1989. I have been through 3 rounds of interferon with no success. I originally purchased Immunocal for my mother-in-law who has **lung cancer**. She noticed an improvement in her energy level right away. I decided to try it for myself and have noticed more energy and an overall sense of wellness. I am anxious for my next doctors visit to see how my blood work-up looks. I have only been using the product for about 3 weeks. My wife has no significant health problems but is taking Immunocal as a preventive measure and is already a believer after nearly 2 weeks. She was a skeptic at first. So now my whole household endorses the product. I look forward to better health and better living! My back pain and pain in my side (from **cirrosis** and **Hepatitis-C**) has improved along with more **energy** and desire to get out and do things." Sincerely, Michael Sinks 05/29/2001

## Hepatitis C Testimonial #17

June 1, 2002 Dear Herb:

Six months ago I was diagnosed with **Hepatitis C**. I always took very good care of myself, so it was very difficult for me to admit and accept that I had contracted HCV. Looking back over the past few years, I could see that my energy level was decreasing. I just thought it was related to my age. My doctor feels that I may not be a candidate for Interferon and Ribavirin treatment. His plan is to perform tests every three months for the next year to see if there are any trend lines available to help further decision making. Three months ago, I started taking one packet of Immunocal daily, along with other supplements that I was previously taking. I continued to take one packet daily for around a month and started to feel slightly better physically. However, I still felt weak and had a hard time getting through the day. I then decided to take two packets of Immunocal daily, and within a few days started to feel much stronger physically, and more balanced mentally and emotionally. I just received my first three-month set of test results. I compared them with previous test results and could clearly see an improvement. I am Optimistic that I will continue to improve and look forward to my next three month test results. Thank you for introducing me to Immunocal. Sincerely, Anthony Talis

## Summary of Baystate Reference Laboratories Results for Anthony Talis

### Test Name: Albumin

#### Date Results Reference Range Points Above/Below Range Comments

10/18/2001 4.0 3 3.6 – 5.0 0

10/24/2001 3.8 36. – 5.0 0

05/17/2002 4.3 34. – 4.8 0

08/12/2002 3.9 3.4 – 4.8

08/12/2002 11.7/TBD 11.0 – 13.7 0

## Hepatitis C Testimonial #18

Stay tuned for more.... August 5, 2001

Approximately five years ago I was feeling listless and generally in ill health so I thought I would go see my Doctor. After a complete blood count I found I had type II diabetes and also the **Hepatitis C virus**. When I asked my doctor what Hepatitis-C was he informed me that they didn't know a whole lot about it yet and called it non A non-B Hepatitis. I decided to venture off on my own to see where a naturopathic/homeopathic course would lead. At this time in my life I was excited and motivated to read and hear everything I could get my hands on to heal myself. After all, your body is magical and given what it needs, the body can heal and repair itself. Anyway, through eating mostly wholesome foods and proper supplementation, I was making excellent progress until my blood test 6 months ago showed my viral load count, which had previously been going down steadily, suddenly shot up higher than ever. I was devastated by this news. After many more tests I made the decision to go on a Doctor prescribed drug called Peg-Interferon and have been administering it for the last 5 months. The side effects from this drug can be severe

and do alter your life style quite a bit. Some of these side effects were weight and hair loss, fatigue, muscle and joint pain, and oh yea, loss of libido. Loss of Libido? Nobody said anything about loss of Libido before I began the treatments. Then, I was introduced to **Immunocal and Magistral**. Two packs of Immunocal in the morning and two late in the afternoon have changed my life. I am no longer fatigued during the day, the muscle aches and pains are gone, the rashes, did I mention the rashes? Well they are gone too. No more soreness on the bottoms of my feet, headaches, sensitive skin, my appetite has improved so I am gaining weight back slowly and my outlook on life has never been better. I am also happy to report that since starting on a tablespoon of Magistral in the morning and one at night and after only nine days my Libido has returned. My wife Susie and I are delighted! Thank you Dr. Bounous and Immunotec Research for giving me my life back., **Jeff Beban**
