

## Lupus

### Testimonial # 65:

Donna Maxwell's Story, I was **diagnosed in February 2003 with Lupus**. I was then put on three different medications including Prednisone. During the first year of this treatment, **my condition slowly worsened** despite the medication that had been prescribed. The **pain in my joints** increased to the point it was necessary for me to begin taking strong pain medication, throughout the remainder of the year. The nights **became very painful** for me to the point that I was unable to even have a good night's sleep, which also began to affect my work as a hair stylist. There were days that I was unable to even get out of bed and this continued through out the second year, and the only treatment that I was getting from the medical professionals was they increased the dosage of my medication. The week before March 13, 2005, the pain and suffering was so much that I was unable to get out of bed; it effected my being able to think correctly. My **weight, which had increased** due to the Prednisone had increased a good 25% over my normal weight of 110, then drastically fell to below 100 pounds. My **blood pressure increased** to 180/97. The doctor said that the protein count in my blood was extremely high and that I would need to take Chemotherapy as the only solution, which I was prepared to do, to save my life. The treatment for the Chemo was set for the 28th of March. On March 13<sup>th</sup>, my mother-in-law, who is a strong believer of natural health and treatment, heard about "**Immunocal**", and on the 17<sup>th</sup>, she started me on the product, which I took **1 pack for 2 days**, then 2 packs for 2 days, and then to **4 packs per day**. After 10 days of treatment, I started to notice a remarkable improvement in my well being. After 4 weeks of treatment, I felt like a young 20 year old person again, and I am now 43. This is the best that I have felt in over 20 years. This is the best that I have ever felt and since I have begun using Immunocal I have not missed one day of work. On the 27<sup>th</sup> of March, **I elected not to have the Chemotherapy** to the doctor's dismay, and do not regret it one bit. I am weaning myself off of the Prednisone; I am taking no pain medication at all. To sum it all up, don't anyone ever try to take away my Immunocal, under the threat of death. I will stay on Immunocal forever. "I have a lust for life". **Donna Maxwell**.

### Lupus Testimonial # 66

"I was diagnosed with **Systemic Lupus Erythematosus** in 1991. This disease can devastate life, as it has in my case. It can cause damage to all the systems of the body. I'm also **hypersensitive to most medicines** used to control the symptoms of Lupus, therefore, I've had to find alternative methods to control it. This has not been an easy task. But recently a doctor informed me about Immunocal. Since I started using this product I've experienced a better energy level. So now I can enjoy time with my family and friends. It's also helping to **detoxify** my body, due to my **sweat glands working better**. I'm happy to have a little of my life returned to me." Sincerely, **L. Harris, Florida**  
**April 11, 2001**

### Lupus Testimonial #67

#### LUPUS & FIBROMYALGIA TESTIMONIAL

I was diagnosed with Lupus and Fibromyalgia two years ago. I was on Prednisone with all its side effects, Zanax for panic attacks, Vicodin for pain, Flexeril for muscle spasms, Prozac for depression, Ambion for sleep and Valium for nerves. I had suffered with constant excruciating headaches for over a year. I could not do **simple chores** and **could not drive**. I also suffered from **inflammatory Bowel Syndrome** and had to use laxatives on a regular basis. I received my first box of **Immunocal** on a Monday and took the first packet at 4:30 p.m. At the time, my legs feet and

hands were causing me great pain and I had **severe headache**. About 30 minutes later, I notice a warm tingling sensation in my legs, feet and hands and about two hours later the pain in these areas disappeared. When I awoke Tuesday morning, the **headache was gone** and my **back pain was gone**. I was able to cook supper that evening for the first time in over seven months. The following Thursday, I was able to vacuum the house, clean my oven and rearrange the furniture. I have been taken three packets of Immunocal a day for over three weeks now. I went through a short period of detoxification as Immunocal removed the drug residue from my body, I am now pain free, able to do my housework and able to drive again. My skin is soft and supple and the spots on my face have faded. My complexion has gone from pale and shallow to having a healthy glow. I have complete mobility for the first time in over two years. My body is back in balance and all bodily functions are normal. Thank-you Dr. Bounous for Immunocal and for giving me my life back **Carol, East Texas**
