

### **Nightmares from Stop Smoking Medicine Testimonial**

My 72 yr old step-father started Platinum Immunocal November 10th, 2009. A couple weeks later he started something from the doctor to help him stop smoking. The medicine gave him nightmares in the night, so my mom had a bottle of Cherry Juice in the house and she started him taking the Cherry Juice before bed... GREAT success, nightmares gone. Then he went to visit his daughter for the weekend and never took his Cherry Juice with him... yes he had a nightmare. When he got home he got back on the Cherry Juice...nightmares gone. He takes 1½ tbsp before bed. My mom phoned and asked us to get some more Cherry Juice ordered right away.
