## Herb Johnsen

### Testimony # 151

Welcome

I have a tremendous passion for Immunocal and Immunotec Research Ltd., and here are my reasons:

- 1) Immunocal is real, without any duplication out there.
- 2) Immunotec is a Research Company and comes out only with quality products. (XtraSharp, Immunocal toothpaste & Prycena are new in the past year or so.)
- 3) Immunocal, with thousands of documented clinical and scientific studies to back up what is said, cannot be denied by anyone.
- 4) 11 method-of-use patents -- the same kind of patents given to drugs and listed in the PDR manual and Pharmacist's Red Book -- the only natural product in the drug section of the manuals. Also, there are an additional 26 method-of-use patents in other countries around the world.
- 5) We are in the right Industry, since economists say by the year 2010 the Health Industry will be over 1 TRILLION DOLLARS. I personally believe at that time we will be near the top in this Industry, because of Immunotec's present rate of growth.
- 6) In 4 years GLUTATHIONE will be as well known as Vitamin C. The only Company that has a product that will increase the production of GLUTATHIONE in all of our cells is Immunotec Research. When this fact becomes well known, every one who is involved will see their sales skyrocket. If you understand how millions were made on Penicillin, then you ought to figure out what will happen here.
- 7) Everyone needs this product, especially in the environment we live in today. Our bodies are constantly being attacked daily with new viruses and many old viruses. Our own body's natural defense against these viruses is a strong immune system. No one can deny what I have just said, and we do not have to argue with anyone about this, for it is a fact.
- 8) With many people who already have a sickness in their body, if Immunocal is taken soon enough and in the proper amount, they can find a Doctor who will help them with this. There are many people who will go into remission from their illness. This has happened many times already.
- 9) Last but not least, the most important reason to me is I have seen how it has affected my own body. I typically take 3 packets a day. Do I have to? NO. Do I want to? YES. Why? Because I have been sick in the past and I don't like it.

I have had Cancer removed out of my body. I have had Heart By-Pass Surgery, and Digestive Problems as well as Sinus problems for years that at the present are not a problem to me.

I personally know people who have put this product to the test with exceptional results and have gone into remission from various illnesses. #9 is my biggest reason for the passion I have for Immunocal.

The only way many of our friends and loved ones will ever know what is available to help them is if you and I tell them. This is an awesome responsibility, once you have been told. Are you acting on your responsibility?

I want to encourage you to print out and save these 9 reasons and keep it with you, because all these reasons are valid and truthful, and it can be a help and encouragement to you when some people reject everything that you have shared with them.

Most people take care of and maintain their cars and homes, which both can be replaced. However, we only receive one body in this lifetime. Sadly, the majority of people are not willing to spend money on their body until it breaks down. When it does, they will spend any amount to regain their health, and sadly, in some cases it may be too late.

Disclaimer: Immunocal in NO WAY Heals or Cures any Sickness or Disease in your Body. Immunocal only begins the process of getting your cells to produce more Glutathione through precursors that are in Immunocal. This in turn strengthens the Immune System. Very Sincerely **Herb Johnsen**

## **Pamela Cook**

### **Testimony # 152**

I had originally suffered with Hypo-thyroid disorder, which was discovered when I was 15yrs. old but had been evidenced in my life from the age of 9yrs. However, at age 31 my sister-in-law noticed a lump in my throat. I would feel like I was choking, especially if I was passionate about a subject, then I would be unable to talk. I shook, had big eyes, was sick looking, couldn't sleep and had a resting heart rate of 120. Overall it was a scary time. It was like my system was on high and I could not slow it down.

I went to Dr. Prince in Windsor. I was diagnosed and treated with radio-active iodine. After about six weeks my system went to the opposite extreme and tests revealed that I had no thyroid function. Thus the battle for me to this day. I also suffered with Endometriosis and cysts on the ovaries with an eventual hysterectomy, all just prior to the above.

It is hard for me to explain what Immunocal/HMS90 has done for me in this respect to the Graves Disease. I have had other health challenges since 1988 that have left their own wake of symptoms and so I cannot be sure what to attribute to what. In 1988, due to the finish on my front teeth, I had six caps put in and within six weeks I was almost totally incapacitated due to mercury poisoning. The dissimilar metal at the back of the caps caused a leak in the amalgam fillings and I went downhill fast. I lost my memory, became bloated, skin pastey and grey, couldn't digest anything, kidney infections and extreme physical fatigue that left me unable to even cook supper or do laundry, etc., all the while the doctors were at a loss as to what was wrong or how to help me.

I went to a herballist and was put on high antioxidants and other preparations and was sent to be tested for mercury poisoning. It was off the chart! For the two months that it took to replace the many amalgam fillings in my mouth I actually took DMSO in water to help clear out the mercury. (DMSO is used topically to remove heavy metals from animals) I have never had the energy, stamina or memory that I experienced prior to this happening.

In 1991 I worked for a furrier, doing accounting. There was a problem with the buildings ventilation and we were all subject to the chemicals used to clean furs. The building was old, had asbestos, and when someone smoked in the lunch room, we all got to share the experience from our offices. Needless to say, an already compromised immune system can only take so much. I went downhill once again and in one year had to leave the job, at the insistence of my doctor. I had severe sinus problems which left the sinus cavities marred with scar tissue making sinus infections a chronic problem. Add to that menopause and you have a recipe for my feeling I was "on the way out".

In November of 2001 I was helping my sister with a painting job and was up a few feet on a ladder. The ladder went out from under me and I landed on the floor, but not before hitting the wall with my right arm extended which caused a severe shattering of the right shoulder, leading to surgery and a diagnosis of Osteopinea(brittle bones). I also collapsed a vertebrae and damaged my right hip.

When I accompanied Lorraine Ford to London for one of her checkups in June of 2002, I was in bad shape. Constant pain, sleeping in a recliner for part of the night due to the shoulder pain and then transferring to a bed, to rest the spine and hip, for the rest of the night. My pelvis would tip and I was unable to hold an adjustment and getting out of a chair and bending down were two actions that caused much pain. Sleep depravation, fatigue, generally wondering what I was here for!

It took until the early part of Spring in 2003 for me to actually believe that the HMS90 Lorraine was taking to help her situation might be of help to Doug and I. I started with one box, and told Doug to take it. If it helped him then I might try it!!! After three days he said that he thought it was good for him and that it was making him feel better. I waited a few weeks, while he took it off and on. In the mean time Lorraine kept calling and giving me testimonies she had heard, etc.

Finally in May of 2003, I wanted to order HMS for my Dad who was terribly ill. I told Lorraine to sign me up and I would see what I could do. I knew I could use what I ordered and that I could re-order at any time with a 40% discount. Before I could get Dad to take the HMS90 he was hospitalized and spent the next two months in two

hospitals. The family of the one who is ill suffers also. I knew the stress we were all going through was going to take its toll on all of the family. I had picked up Dr. Gutman's book from Lorraine's counter and started to read it while outside of the waiting room of the ICU where we awaited news of whether my dad would live. I was taking one pack of HMS at the time. As I read, I started to up my intake of HMS and was at two to three packs per day by the time I had finished reading it.

A year later I can certainly attest to the benefits of HMS90 and the Xtra Sharp. I can bend over to do gardening, instead of crawling. I get out of a chair pain free. The constant pain at the area of the collapsed vertebrae is mostly gone or barely noticeable. My chiropractic adjustments are holding and I need only go once a month instead of twice weekly. I am remembering more and have clearer thinking and I have the energy to start my day in the early morning and keep on going till sometimes 11:00 or so at night. I have a sense of well-being - I find myself saying out loud, to God - "I feel really good today. Thank you Lord for this beautiful day!"

Another good result of taking the HMS90 was the disappearance of Parkinson-like symptoms. Although never diagnosed, I experienced what I referred to as seizures on my right side, starting at the head, then travelling, in an instant down my right arm, causing me to drop whatever was in my right hand. I would stumble on the slightest thing as my right leg wasn't doing what my brain told it to do. This problem had been progressing over the last few years.

The china is now safe! No more jerks, no stumbling, just an inner sense of well-being.

I will always be grateful and will hold an extra special place in my heart for Lorraine Ford, who, regardless of her own health challenges, chose to reach out with love, to help others by spreading the word about Immunotec's life changing products.

**Rosalie O'Hara**

### **Testimony # 153**

Thursday, August 24, 2000 was the beginning of a brand new life. I took my first pouch of IMMUNOCAL in the morning, one in the afternoon. No reaction.

The next morning I took a pouch of IMMUNOCAL and one in the afternoon. A couple of hours later, I began to eliminate black fluid, which continued on for a total of six sessions the same day. I took one pouch on Saturday and one on Sunday with the same thing happening, diminishing in intensity.

By Monday August 28th, the poisons were flushed out of my system and a new person emerged. It was a new morning! I went back to two pouches per day of IMMUNOCAL.

### **A LIFE OF HELL!**

The nightmare began in October 1997 when I fell and jolted my body. I had pain in the right hip that became progressively worse. Unfortunately, no physician diagnosed this pain which was in fact emanating from the spine and I actually cancelled hip surgery at Lenox Hill Hospital. One doctor after the other was looking at only the hip.

Then I tried a succession of different pain medications, and since I was walking with 2 steel crutches hooked on my forearm, I was losing the use of my legs. I was on the road to being permanently crippled. My wonderful husband, John, newly retired, drove me back and forth to work from Brooklyn to Queens, making 2 round trips a day. I wasn't able to dress myself. Putting on stockings was impossible.

Refusing to accept this "no life" existence, I went to the Rehab doctor at Elmhurst Hospital Center where I worked in the Department of Anesthesiology. After several months of physical therapy on my legs, (and my arms – which also were affected by the fall) the Rehab doctor said now that my muscles were stronger, there was nothing more they could do. She felt badly about the pain persisting and suggested acupuncture.

Acupuncture treatment was in its infancy at the hospital where I worked. Blessedly it helped; I responded very quickly – and went twice a week for several months. I was almost totally pain free. It only lasted as long as the acupuncture

treatments. I was back in pain. Because my desk at hospital was so busy, I made that the priority and went haphazardly and acupuncture did not work.

Then, in late August 1999, I began to get pain from the back of the top of my other leg radiating down to the foot, and numbness was developing in both legs and feet. In a matter of a couple of weeks of medications, epidurals, I was again in a hopeless condition. Now, I was experiencing deadly, relentless pain and I preferred death. Through the intervention of an anesthesiologist, who was also a neurologist, and who knew immediately my problem was neurological, I finally was diagnosed and helped. On October 5, 1999, I was operated on my spine, three vertebrae, by a wonderful neurosurgeon at New York University Medical Center. I came out of the surgery with flying colors; in four days I was home, no pain, no medications.

Five weeks later, on my first post-op visit to the surgeon, I, again, could not step on my right leg. PAIN! The doctor said I could always go back into the OR. (It just was not my destiny to be free of all this.) I did not want more surgery! Something in my gut told me it wouldn't come out the same as the first surgery. Since it was the L5-S1 vertebrae (the tail) I knew it would not be an easy rehabilitation. The memory of the road back from the trauma of surgery is vivid after having had five serious operations on the legs and spine.

After several months of pain progressing to severe pain, a lot of different medications, winding up with Tylenol three /Codeine, then Percocets, eight per day, the surgeon wanted me to try a nine-day regimen of Prednesone. I vehemently protested, "no steroids". My original surgeon at Hospital for Special Surgery – Cornell – also said I should try it to see if the inflammation would subside. After two weeks, I had the prescription filled. It was a complete waste of time and only added to the poisons already in my body.

Three days after I finished the Prednesone, I woke up with one swollen leg that was twice the size of the other. I was immediately hospitalized with a blood clot in the back of my right knee on March 28, 2000 and have been on Coumadin ever since.

Out of desperation, from end of May to July I was scheduled for surgery twice. The first time, I panicked and cancelled. The second time, it was the internist who refused to clear me. It was too risky because of the clot. I wasn't on Coumadin long enough. What to do!

I sought out the acupuncturist and went to her privately and had no reaction whatsoever until a few days after the fifth treatment. This time, I didn't respond so quickly but I was so desperate, I stuck with it and it slowly began to work.

Now I had already started getting pains in my abdomen which increased (it always gets worse). I was bound and had many problems eliminating. One night when I couldn't sleep at all from those additional pains, I tried to stop all medications cold turkey. I was up for 36 hours, again pleading with God to heal me or take me. I wound up calling the Director of the Pain Management Clinic at Elmhurst. She told me I couldn't stop that way and wanting so much to help me, offered Codeine by itself, which I refused. So she suggested weaning off the Percocets, one less pill a day for a week. Here I was totally debilitated, functionless, and struggling in a drugged stupor.

### **A NEW LIFE – MY PRAYERS WERE ANSWERED**

In August 2000, a week and a half after my talk with the doctor, a friend of mine, Michael Blinick, whom I hadn't spoken to in over a year, called to see how I was doing. I told him of my condition and said I was going to die of stomach cancer if not because of the spine. I had no life and I would prefer leaving this misery.

He said he could get me help right away. In three days I had IMMUNOCAL and here are the dramatic results:

- I got off the pain medications immediately without having to wean off. I did not have any withdrawal symptoms and no longer walked around in a dazed condition.
- I stopped taking Prevacid, antacid.
- By the detoxification, the pains in my abdomen disappeared immediately and completely. I haven't had anything but a normal elimination since then.
- The inflammation has greatly subsided in the spine and hip staving off surgery until today. I still have spinal stenosis. If I do need surgery, I'll be able to tolerate it and be better prepared.

- I had had a vascular problem for several years with “black and chronic swollen feet” and wore Surgical stockings when I could put them on. The acupuncturist noticed on the Tuesday after I started IMMUNOCAL, “Your feet are normal.” I hadn’t been paying attention because of the other problems. No more need for stockings.
- This is the first year since 1993 when I had pneumonia, that I haven’t taken a flu shot. No usual Winter cold/virus
- My chronic acute sinus condition is GONE. I have been taking two to four pouches of IMMUNOCAL every day. Because I’m still on Coumadin and cannot take Vitamin E, I’m just taking one B Complex tablet, and 2-3 Vitamin Cs daily along with IMMUNOCAL.

Since taking IMMUNOCAL to build my immune system, I have energy I haven’t had since my twenties. Also, I found by taking a third pouch, I feel even stronger, and my body has begun to correct little things like a small growth, the size of a pencil’s eraser, on my skin on the inside of my arm. One morning, about three months ago, I went to finger it and screamed to my husband that it’s gone. All I have left is a small dot of skin discoloration as a memory.

Am I passionate about IMMUNOCAL? You bet I am!

I’m so happy to be alive. My life has been a great joy with my newfound health. Now I am sharing my experience with IMMUNOCAL with everyone, with the world. So many people, all with different medical challenges, are now changing their lives with IMMUNOCAL through me. What a blessing for all of us! March 20, 2001

## **Nancy**

### **Testimony # 154:**

Dear Family and Friends,

Nancy saw her urologist yesterday. What has happened needs some perspective. Some of this you may have heard before in a different context.

### **FROM THE EDGE OF DEATH**

For the first time in forty years I heard Nancy say something she had never previously said, “I don’t think I’m going to live much longer.” And that is how the summer of 2002 began for me.

I want to say that I believe in prayer and that God answers prayer and at times He “moves in mysterious ways His wonders to perform.” I want to thank everyone who has prayed, and I hope you will continue to pray.

On June 28 Nancy’s urologist admitted her to Graduate Hospital in Philadelphia, Pa. because of high levels of e-coli and Beta strep in her pelvic area and in her urine cultures. She began giving her strong antibiotics IV --Vancomycin 1000 mg. along with Gentamicin. She was also on a morphine drip for pain. This lasted for five days. At the end of five days, Nancy had a temporary “port” inserted in her left arm. She continued at home on Vancomycin 750 mg. IV twice a day. After three weeks, Nancy began to have a reaction to the Vancomycin and had to stop the treatment.

During this time she was seeing her urologist every week. After 26 days of antibiotics, e-coli and Beta strep were still showing up in the pelvic area and urine cultures. The antibiotic treatments had not eliminated these bacteria totally from her system. I don’t think the doctor knew what else to do except more of the same -- back to the hospital if her condition worsened.

“God moves in mysterious ways His wonders to perform.”

Around July 12, Nancy began to take as a last resort a whey protein that would provide the ingredients for her cells to begin producing and raising the levels of Glutathione. On August 30 Nancy again returned for her weekly exam. This time her urologist said there was no sign of any bacteria in her pelvic area. However, Beta strep and e-coli were still showing up in her urine cultures and she had to come back in a week -- but to also continue taking the protein she was taking.

Yesterday -- September 6, 2002 -- her urologist told her that there was no Beta strep or e-coli showing up in her pelvic area or in her urine cultures and to come back in THREE WEEKS. All glory to God for this significant change. He still answers prayer.

I believe that what Vancomycin and Gentamicin couldn't do, the increased Glutathione levels in all of her cells did thanks to Dr. Bounous and the whey protein -- Immunocal -- that provided the ingredients to the cells so they could produce and raise the levels of Glutathione. Aging, fighting diseases, and stress cause the Glutathione in your cells to become depleted. HOWEVER, this whey protein delivers the ingredients to the cells for them to replenish the Glutathione and even increase the levels in the cells.

I must repeat what the research doctors are saying because it has implications for everyone:

1. Oxygen is a fuel. All fuels when they are used emit a pollutant. The pollutant that oxygen emits is called a free radical. Researchers say that these free radicals are responsible for between 300 to 400 disease processes. They are so important that a whole new science has emerged -- Free Radical Biology.

Researchers have learned that Glutathione is a powerful antioxidant and will destroy these dangerous free radicals which can cause cell damage and can disrupt the DNA in the cells which will cause the cells to mutate. This mutation can lead to cancer. The presence of Glutathione is also necessary for other antioxidants like Vitamins C & E to work.

2. Because aging, fighting diseases, and stress depletes the Glutathione supply in the cells, it diminishes the capability of white cells to fight disease. Research doctors have discovered that Glutathione is the food or fuel that the white cells need in order to effectively fight infection.
3. Glutathione is also a powerful detoxifier ridding the body of cigarette smoke and other environmental pollutants and carcinogens which cause cancer.? Dr. Jimmy Gutman, M.D. There is only one known natural source that possess the ingredients that the cells can use to produce and raise the levels of Glutathione. I call it a miracle protein. The trade name for this whey protein is Immunocal.

?Most doctors along with the general population have never heard of Glutathione. And yet within the next five years it will increasingly become part of the practice of medicine.? Dr. Gutman, M.D.

Nancy still has some major health problems. But returning ?from the edge of death? certainly is a significant step to a brighter and more hopeful future -- a longer and healthier life.

For me I can say at age 60 that I am feeling healthier, have more energy, and have a greater feeling of well-being than at any time I can remember. I feel like I'd say like 40 again. There is a sense of joy of living. I know we have faith and there is a joy that comes from a spiritual change. But this a joy of physical well-being and vitality.

I have to admit -- I LIKE IT!

I hope this information is an inspiration and help to you -- **Wellington & Nancy (Sept. 6, 2002**

## **Jim Spencer**

### **Testimony has unique reason to appreciate Immunocal # 155**

#### **Immunotec Brings Family Harmony to the Sunshine State**

Jim Spencer didn't come to Immunotec Research the usual way. He was working as a photographer and advertising consultant when approached by an associate to produce a campaign for Immunocal in the United States. The US government had just approved Medicare and Medicaid reimbursement status for Immunocal. Jim needed to do some research in order to properly sell the company and its products. What he read convinced him that Immunotec was home to a breakthrough.

In January of 1999, Jim called six friends and convinced them to travel with him to Immunotec's Home Office in Montreal. They left 80temperatures in Florida for a frigid -30in Quebec. Thankfully, t he reception at Immunotec was a warm one! The group spent an entire day with Chuck Roberts, John Molson and Dr. Gustavo Bounous. They toured the facilities, asked questions and looked at the company's direction with regard to its compensation plan. Fortunately, Dieter Beer and Dr. Jimmy Gutman happened to be in the office that day, and Jim and his group had the privilege of first-class exposure to the company and its principals.

Jim arrived back at his home near Miami, determined to make a concerted effort to build an Immunotec business.

The first person he really wanted to test the product on was his mother-in-law. She was the reason that Jim had originally moved to Florida from his home in New York. She was virtually bed-ridden, disabled by fibromyalgia, arthritis and osteoporosis. Jim had purchased a large home and moved her in with his family. Although she was enduring painful cortisone shots every six weeks, she refused to try Immunocal because it hadn't been prescribed by her doctor. So each day for the next 3 months Jim mixed up an Immunocal drink and took it himself.

And then the flu hit the Spencer home.

Jim's wife, his mother-in-law and the children all suffered the multiple discomforts of the seasonal onslaught: fatigue, nausea, aches and pains and fever. At least one out of every 10 Americans comes down with the flu each year, usually between late fall and early spring, but having been on Immunocal for three months, Jim was not affected at all. After noticing this, and when she recovered from the flu, Jim's mother-in-law decided to try Immunocal too. Over the next ninety days Jim observed a transformation in her. The symptoms that had limited her movements began to disappear. She started to do chores around the house – sweeping the kitchen and tidying up after the children. She ventured outside and began to shop again. In her fifth month on the product, she bought her own house ... and moved out!

In the years since Jim has been with Immunotec, he's seen a dramatic increase in his sales organization. With recent changes to the Compensation Plan, he knows that a great deal more growth is on the horizon. Since its inception in May of 2002, Jim has been an active member of Immunotec's Achievers Club. Immunotec audiences have benefited from the in-depth product knowledge he shares while touring North America with Jim Britt, headlining at Health/Wealth Seminars.

Aside from the obvious benefit – hey, his mother-in-law did move out! - Jim enjoys the freedom his Immunotec business affords him. He can travel, pursue his personal interests and take time to spend with his wife and children.

Next time you talk to Jim about his Immunotec experience, you'll know why he's really smiling

## **Brenda Noble**

### **Testimony # 156**

#### **Personal Testimony by Brenda Noble From June 18th to September 1st 2002**

For a period of 2 years I suffered such severe illness that I approached 12 different Medical Specialists and one Chinese Naturopath Doctor in an effort to find relief. In spite of all this medical consultation I continued to suffer continuous body pain, and fatigue 24 hours a day and 7 days a week. This type of suffering led to depression as well because I could obtain no relief.

One Specialist diagnosed me with Polymyalgia and suggested I go on the steroid Prednisone. Another specialist said I had a nerve that was pinched in my neck and also suggested Prednisone. Due to having Pharmaceutical experience for 14 years, I knew the terrible side effects of Prednisone and so I refused both Doctors. One of the Doctors went so far as to tell me that if I did not take it I would die. However, I was determined not to and hoped that I would some day find a natural cure for my problem.

In February of 2001 a Chinese Naturopath Doctor informed me that I had poor circulation of my blood which in turn was weakening my kidneys. He insisted he could cure me, so I started treatment that day with Acupuncture and began to boil and take the herbs he prescribed twice a day.

Five months, and \$7,000 later I was able to lift my arms, and walk much better. This made me very happy and I began to have hope. However, my happiness was short-lived. As soon as the winter months set in the pain returned, and within a few months I was bedridden. By May of 2002 I could not walk, and found myself in severe pain with terrible swelling in my legs and feet. The inflammation seemed to worsen by the hour.

Thinking I might have a kidney problem, I asked my Family Doctor of 10 years for a referral. He refused to refer me to see a kidney specialist as he said there was no need for the government to waste money on doing tests on me.

After insisting that he refer me, he did so under protest, and as he handed the paper to me he said 'if you go and see this Kidney Specialist I never want to ever see you in this office again.' I left that office in shock with tears in my eyes thinking how could a family Doctor of 10 years do this to a patient?

I faxed the referral paper to the Kidney Specialist and when his office staff called me I was told my Doctor put a question mark on the comments section. I explained my ex-doctor does not know what is the matter with me. I was given an appointment within 2 weeks. I soon found another doctor

The Kidney Specialist located in Richmond Hill, Ontario started tests on a Thursday and on Friday with Ultra Sound. By Monday a second Kidney Specialist saw me and ran additional tests. He discovered my entire Kidney was infected and inflamed. My Potassium levels had dropped far below normal level and for this reason I could not be given anything for the pain or inflammation. The most I could do was bathe my feet and legs and take Aspirin to try and ease the pain. However, nothing I did worked. Every day I cried from the pain. I could not sleep and my energy level was zero. By this time I was reduced to being in a wheel chair as I could not ambulate. I had to crawl on my hands and knees every day to get to the washroom and my meals were carried to me by my husband.

I had always been an active person, and exercised daily. I loved to participate in sports and to work with and help people. The thought now occurred to me that you can have all the money in the world but if you don't have your health you have nothing. Nevertheless, I am the type of person who never gives up and I had faith that some day I would find the answer to this health challenge and find a natural cure. I clung tenaciously to this hope.

In June 2002 my girlfriend Leslie called me and said she found a product that could help me. At first I thought it might be another fly-by-night product which will cost me more money and not do anything. Leslie felt my problems were tied in with my immune system. She asked if I would listen to a friend of hers from Florida named Jim Spencer who would explain a wonderful product to me.

Being skeptical I asked if the product was sold through MLM and she said 'Yes'.

I reminded Leslie I couldn't even walk let alone do a new business. As much as I wanted to go back to work for the past 2 years I simply was not ready for this. She told me not to worry but to just listen to him and for the moment I was inspired to listen to what he had to say.

Jim called me later that day and asked me a few questions. He explained the science behind HMS 90 for about a half-hour. He assured me he was not interested in me doing any business right now, but he promised me, based on what I had told him, and if I took the right amount of HMS 90, within 5 days I would probably be out of bed and walking. I remember thinking that this guy must be God or this is one Miracle Product, as not even a Doctor had told me those words. I just had to have faith that he was not bluffing me.

He gave me a website address so I could do additional research on the product. I had to literally crawl to my office to look it up. As I began to read about the company and the clinical trials I began to feel better about the HMS 90 product and the Immunotec Company which I learned came from Montreal, Canada.

When the product arrived in 2 days I started to take it 3 times a day.

By the third day I was amazed that I was able to get out of bed and walk again WITHOUT PAIN. The inflammation was starting to go away.

By the 5th day I was able to drive 3 hours to my family reunion.

By the 7th day I was able to travel to my Niece's Graduation.

By the 9th day I had begun to feel a more stable energy level. I was smiling again!

After ten days I was able to go down the stairs without holding onto the railing. I no longer had to lift each leg with my hand and move tediously from one step to the next.

Incredibly, by the 12th day I was actually running up and down the stairs. I felt as though I could have flown out the door without wings. I was so happy and so thankful I had for this dramatic recovery!

As requested, I had taken 3 packages a day of the HMS90 for the first week, and after that 2 a day. By September I was only taking one a day and I feel great!

After I had been several weeks on the HMS 90, the Kidney Specialist called and asked me to go back to his office for a number of new tests. When I returned this time I went alone and was able to walk into the office with no pain. I saw him on August 2nd, but did not receive the reports back until August 26th. When I returned to see him a funny thing

happened. Initially I had been found to have an infection in my kidney and very low potassium. However, the second group of tests seemed to confuse him as he looked at my chart. In fact he got up from his chair and went back to the office computer to look up my chart again. He was convinced that there was an erroneous report in my file! When he came back to the office he said "Brenda the second group of tests shows no inflammation or Infection around your kidneys, and your potassium is normal! (This was the first time in nine years it had been normal) What a tribute to HMS90 and Xtra Sharp!

What did you do?, he asked. "I know you were taking aspirin and bathing your legs and feet but it doesn't seem possible it could do this! I explained I had stopped doing those things because a friend had sent me this product. I opened my purse and showed him the HMS 90. When he saw it he said he had heard many Doctors talk about this product at the hospital. I asked why he didn't put me on it back in June. He said because he is a Kidney Specialist and doesn't prescribe this product. "Well", I said, "I think maybe you will be in the very near future." He smiled and said, "Brenda I am very happy to see it helped you and our tests prove that it works. I can tell you have no pain and can see you are smiling and walking very well. I would suggest that you continue to take this product, and in 6 months I will ask your family doctor to send you for more tests to make sure it continues to work."

Shortly thereafter a girlfriend of mine named Debbie Quincey called to see how I was doing. She could tell by my voice that something had happened to me. She said, "you sound so good! What did you do?"

I told her the whole story with all the wonders that the HMS 90 had done for me. She then asked if the company marketed by multi-level? I told her it was. Then she asked if I had joined the company yet. I told her no, but that a friend had sent the product to me. Suddenly, she announced I better not join this MLM company without her being the first person under me! I laughed, and reminded her that she was already focused on another company and I would not want to take her away from that.

"You are my mentor. If it has helped you this much you're bound to do the business, and I want to follow and do it with you." That very same night our upline-to-be, Jim Spencer & Francine called, and I tied in Debbie so she could listen. After they explained the products and the company to her there was no hesitation on our part. We both joined that same night with Action packs! Not only has HMS 90 made a profound change in my health but now it's given me a new livelihood!

I now have the desire to share this product with as many people in the world as I can. Hopefully it can not only help them get their health back, but it could also change their financial life as well.

By mid-August I felt so good that I decided to go to work full time. I now had a wonderful team with Debbie, John, Carlton & Arnie. With the support of my upline, along with the confidence I have in the HMS 90 product and this wonderful company Immunotec Research I was able to reach the Gold Distributor Level by end of August .

I plan to help my team attain that level next as I want them all to follow me and this company to share this product with the world.

I still feel great each day and I am thankful to the many people who have helped me to recover and give me hope again in my life.

Thank you Immunotec for the vision and research you had with the HMS90 / Immunocal Product.

**THE SKY IS THE LIMIT, REACH FOR THE TOP AND NEVER GIVE UP!**

Sincerely, **Brenda Noble** Toronto, Canada

## Barbara Fairchild

### Testimony #179

#### Story

#### Barbara Fairchild: Her desire for her Mother's improved quality of life led her and sister to

Two-time Grammy nominee, Barbara Fairchild, is no stranger to the world of music and entertainment. Barbara has been entertaining since she was five years old.

Recognized by many for her appearances on TNN's Nashville Now with Ralph Emery, Crook & Chase, and most recently, Prime Time Country, people have enjoyed her heartfelt singing, down to earth personality and humorous perspective on life. She has appeared on the Tonight Show, Hee Haw, and the Trinity Broadcasting Network (TBN). Barbara's live performances have also included many European and USO tours.

She and husband Roy Morris settled in Branson, Missouri in 1992, where they have fallen in love with the Ozarks and its people. She has been guest performer at various Branson theaters and in 1993, she started performing in her own show.

Though Barbara's demanding show schedule keeps her busy, she still makes time for her family; husband Roy, their five children and seven grandchildren. Indeed, it was the concern for a loved one that brought Barbara to Immunotec in May 2003.

Barbara and Roy were traveling in the Denver area when their friends and hosts told them that someone was going to come over to talk to them about glutathione. Of course neither one of them had any idea what glutathione was, but when it was explained that it had to do with the immune system, Barbara was all ears. Roy had successfully battled cancer a few years before and they both knew how essential a strong immune system is. That night, as they listened to Immunotec distributors Candice Adams and Mildred Nelson talk about Immunocal, they realized that the bonded cysteine supplement might be helpful for Barbara's mother, Opal. In her late 70s and battling both Alzheimer's disease and Parkinson's, she no longer recognized her family, didn't talk, kept her eyes closed for days at a time and was fed by tube. In her isolation, her head jerked constantly. Never one to be too quiet, Barbara declared that if Immunocal could help her Mama, the whole world would hear about it.

Watch out world! In the months that followed, the progress was steady but sure. Opal began to reply with single word answers. The doctors took her off six of her nine medications and reduced the dosage of another. In April 2004, a videotape made while she was visiting her home amazed her doctors. It shows her being very interactive and responsive, talking, laughing and playing games with her grandchildren as they gathered around her bed. Today she talks, jokes and is amazingly different from the sickly woman of a year ago.

During this time, Barbara and her sister Bernice Arnold learned to be their mother's surest advocate. Bernice is also an Immunotec distributor and shows her love and concern for her mother by making daily visits to her residence. When nursing home staff found it challenging to mix the protein or to administer it on a regular basis, Barbara and Bernice were adamant that it must be done. They stood toe to toe with health professionals and insisted that they do what it took to help their mother.

A year later, they no longer have to insist. Having seen the marked difference in one person's quality of life, staff members happily comply with the ladies' request that Immunocal be a part of their mother's diet. Persistence pays off! Most of the staff have become Xtra Sharp customers and recently, some have signed up as Immunotec distributors.

And true to her word, Barbara's world is finding out about Immunocal! Hundreds and hundreds of people she has met on her travels have been helped and are seeing joy arise out of suffering. Barbara believes that "a man with an experience is never at the mercy of a man with an argument". As a recording artist, Barbara might not think of herself as a salesperson, but when she tells the story of her mother's experience, it doesn't take much more to sell a box of product! Once you have experienced the benefits, then, if you find you don't like selling, you don't sell. You just share your experiences.

In the past year, Barbara has seen her check grow to over \$6,000 per month. She and Roy have watched their business become a family affair with all five of their children involved as distributors. And each of their grandbabies, from ages three to eight, takes Immunocal. She continues to count her blessings -- among them, her gift of singing and having her mother literally given back to her. And unlike the lyrics to her trademark "Teddy Bear Song", Barbara doesn't have a "sewed on smile and a painted twinkle in her eye" -- her; happiness comes straight from the heart!
