## Improve moisture and provide antioxidant protection!

Healthy-looking skin begins on the inside with a balanced diet. And did you know that you can also give your skin what it needs by nourishing it from the outside?

Intact, healthy skin is your body's first defense against infection. As well, untreated, dry skin can sometimes lead to dermatitis. Research has indicated that approximately 8 million people in the U.S. alone suffer from this skin condition.<sup>1</sup> Our skin is also continually exposed to radiation, toxins and free radical formation. Protection from these harmful agents is essential!

### THE GOOD NEWS!

You can moisturize and protect your skin for a healthy-looking complexion and more youthful appearance.

### YOUR KEY TO GOOD HEALTH

Immunotec's Skin Perfecting Cream nourishes your skin with a proprietary blend of beneficial ingredients including our world-renowned Immunocal®.

### BENEFITS:

When used as a mask, Immunotec's Skin Perfecting Cream provides a rich source of nourishing and innovative ingredients, keeping in line with Immunotec's commitment to science and quality.

When applied regularly, users have found that this product has an anti-aging effect as it improves the appearance of sagging skin through firming and even reduces the appearance of fine wrinkles and age spots.

### FORMULATED WITH SELECTED INGREDIENTS

With regular application, you can expect a soft and evenly toned complexion due to specially selected ingredients such as **Emu Oil**, which has natural and moisturizing properties and **Lavender**, which helps to promote healthy skin circulation. Finally, **Immunocal®** is included, a powerful product that is the result of over 30 years of research.
