Psoriasis

Testimonial #112

I have suffered from **Psoriasis** for nearly 10 years, and when I say suffering I'm not exaggerating! My dermatologist said that mine was a severe case - I would say that was an understatement. It was not unusual for my whole body to be covered with itchy, scaly eruptions (my scalp and legs particularly) bleeding or covered with scabs. Unfortunately my dermatologist could not do very much to help me. The only thing that seemed to help me partially and only temporarily was to take a trip to Mexico every two months - an expensive and disruptive treatment. Who knows what more serious damage I was inflicting on myself by overdosing on ultra-violet rays! I was introduced to Immunocal just when I was about to schedule a trip to Mexico. My dermatologist had explained to me that Psoriasis was a condition which involved the immune system so I felt that Immunocal offered at least a potential for helping me. I was not ready for what happened next. After only 4 days of using Immunocal the improvement was both visible and dramatic - I would say about a 75% improvement and no more bloody patches and scab.

Thank God for Immunocal and Dr. Bounous! **Roman Motyka, Quebec, Canada**
