

Soft Tissue

Testimonial # 52 :

Hello Dean,

I am glad to give you a report on my experiences with HMS90. I suffered lower back pain for 7 years after a car accident. Another vehicle hit me from behind at a red light with such force that it totally demolished both our cars. The doctors called it **soft tissue damage aggravated by stress**. I did therapy, 6 months of acupuncture and massage to no avail. If I dropped something on the floor I could not bend over to pick it up. And none of the therapy the doctor prescribed changed this. The very first week I starting taking HMS90, my **backache** went away! And I could now bend over to pick up items I had dropped on the floor. I was thrilled. After 11/2 years on HMS90 my eye doctor said my **eyesight** was improving and changed my eyeglass prescription. Each time I have my eye exam, he has said my eyesight has improved even further. I take one packet once a day, faithfully. It has given me a much better quality of life, pain free. I am 60 years old and feel 45.

Sincerely, Karen Sharp
