

Tumors

Brain Tumors:

Tumors Testimonial # 98

"I had a **brain tumor** in 1997, and I have felt tired, depressed and in constant pain from **arthritis** in the hands. I was on medication from my doctor for the pain and on medication to prevent **infections**. I began taking immunocal and my **energy returned**, my pain was reduced to the point that I removed the glove that I had to wear. I don't know of any new infections that have been detected, high sugar was detected, but it is now at a controllable level, my stamina is something to enjoy now and I feel like I am a whole person again." Sincerely, Ralph J. Copley 05/23/2001

Malignant Tumors Testimonial # 99

Dr. Petrosino "[My mother] is doing terrific on Immunocal. I am genuinely thrilled as quite frankly, I didn't see her living long at all with **two malignant tumors in her liver**. She has figured out how to mash up the powder in order to get it to mix with juice or water, but I guess I thought she would receive one of the vortex mixers when she received her order." Sincerely, Lee T. Tuesday, August 07, 2001
